Pertti (Bert) Hakkinen Released this week is a project led by me, with expert help from many others: "The tools in Chemical Hazards Emergency Medical Management (CHEMM) provide a comprehensive resource to help responders make safer decisions and provide them with the right information when it is needed most. CHEMM enables first responders & other healthcare

providers and planners to plan for, respond to, recover from, and mitigate the effects of mass-casualty incidents involving accidental or terrorist chemical releases."

- PHE
